ANCILLARY EQUIPMENT ADD-ONS

50%

of customers using N₂ in manufacturing also rent stand-alone filtration skids consisting of 2 coalescing filters and a final carbon for ISO Class 2 quality outlet gas.

65%

of customers renting high pressure compressors (640 PSIG and up) also rent outlet hoses.

15%

of customers purchase optional start-up support.

12%

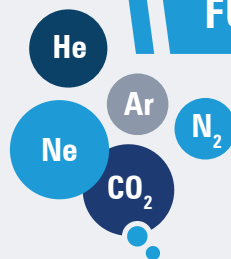

of customers rented an optional enclosure to store & utilize the rental compressor package outdoors.

FUN FACTS

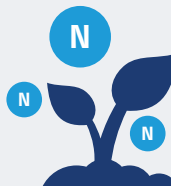

42%

of customers renting a containerized breathing air solution do not require breathable quality air; they require clean, dry, air.

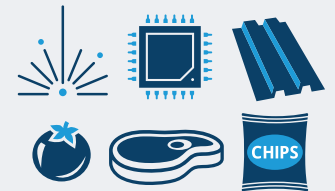

29%

of active rentals are for specialty gases including Helium, Argon, CO₂, Neon, & Nitrogen.

Nitrogen is the single most important consumable used in agriculture for crop yields.

However, our customers use Nitrogen for a variety of applications such as: metal laser cutting, electronics manufacturing, steel manufacturing, creating inert environments, extending the shelf life of everyday foods such as meats, fruits, vegetables, and snack foods like chips & pretzels.

“

We have rented several high-pressure Sauer Compressors in the past year for one of our customers while they waited on their brand-new compressors to be built, shipped, and installed. The team at Sauer has gone above and beyond to meet the needs of APO and our customers. Because of this world-class service, our customer has experienced little to no downtime.

”

Dan Pollock, APO Pumps and Compressors
